

Dear God,
Please help us to:

Respect those who have been through so much to help us.

Adapt to tough situations like the N.H.S had to and to be

Inquisitive to find solutions like the key workers.

Never be afraid to collaborate in creative ways.

Be resilient, always give it all other go like Scientists when developing a vaccine and guide us through this

Odyssy of a journey and keep

Walking on, be courageous.

Amen
